## PROFESSIONAL SUMMARY

DevOps Engineer with 3+ years of experience designing scalable, secure, and highly available AWS infrastructure for cloud and on-premise workloads. Skilled in Infrastructure as Code (Terraform), CI/CD automation, Docker, observability (Prometheus, Grafana, CloudWatch), Linux administration, and cost-aware cloud operations. Cut deployment time by ~30% through CI/CD automation and supports production environments end to end.

## TECHNICAL SKILLS

**Cloud (AWS):** EC2, S3, IAM, VPC, ALB, CloudWatch, Amplify, WorkSpaces
**IaC & CI/CD:** Terraform, GitHub Actions
**Containers & OS:** Docker, Linux (Ubuntu), Windows
**Monitoring:** Prometheus, Grafana, CloudWatch
**Networking:** VPC, NAT, DNS, SSL/TLS
**Databases & Scripting:** MySQL, Python
**Version Control:** Git, GitHub

## WORK EXPERIENCE

### DevOps Engineer

Sep 2023 – Present

Nogrunt Collaborations Pvt Ltd  Bangalore, India

*A QA automation company helping teams accelerate test creation, maintenance, and analysis — enabling up to 15× faster testing on cloud and on-premise.*

- Owned and managed production AWS infrastructure (**EC2, S3, IAM, ALB, VPC, security groups, DNS**) using high-availability patterns, including custom domains across external DNS providers.
- Cut deployment time by **~30%** by automating CI/CD with **GitHub Actions** and AWS Amplify and standardizing infrastructure with **Terraform**.
- Engineered **Application Load Balancers** with target groups, listener rules, and health checks to improve traffic distribution, fault isolation, and availability.
- Enforced **least-privilege IAM** roles and policies across environments, tightening access control and security compliance.
- Set up **CloudWatch** monitoring and alerting for application health and resource utilization, enabling proactive incident response.
- Managed **MySQL** databases across **3+ project environments** with scheduled backups, performance tuning, and cloud integration.
- Supported **3+ deployments** across AWS and on-premise environments, covering Node.js workloads, database administration, monitoring, and access management.
- Applied cost-aware practices, choosing fit-for-purpose AWS services and standardizing environments to reduce manual operational overhead.
- Coordinated releases with **QA and development teams**, integrating deployment strategies into automated testing workflows to improve release stability and handoffs.

## KEY PROJECTS

### Titan AWS EC2 · S3 · ALB · IAM · CloudWatch · MySQL

- Engineered and deployed a Node.js application on AWS using **EC2, S3, and an Application Load Balancer** to support scalable, fault-tolerant application hosting.
- Applied AWS security best practices with **IAM policies, security groups, and data encryption** to protect application and infrastructure access.
- Owned application-level **CloudWatch alerts** and standalone MySQL database operations to improve availability, observability, and incident response.

### Davinci Apache Tomcat · Prometheus · Grafana · MySQL

- Deployed and managed a Node.js application in an on-premises environment using **Apache Tomcat** for application hosting.
- Implemented monitoring and alerting with **Prometheus and Grafana** to track system performance, health, availability, and operational trends.
- Configured and administered the MySQL database using **MySQL Workbench** for maintenance, troubleshooting, and optimization.

### Dream Folks AWS WorkSpaces · Simple AD · VPC · NAT · MySQL

- Deployed a Node.js application on **AWS WorkSpaces** integrated with Simple AD through AWS Directory Service.
- Built and maintained a dedicated MySQL database environment for application data storage and administration.
- Designed a secure AWS network using **VPC, public/private subnets, and NAT instances**; administered WorkSpaces user access, provisioning, updates, and decommissioning.
- Applied lifecycle and access-management controls to improve endpoint governance, reduce unused resources, and support cost-aware operations.

## EDUCATION

**Master of Technology – Computer Networks Engineering** Oct 2020 – Mar 2023
SJB Institute of Technology Bangalore, India **CGPA: 8.5 / 10**
